

Refund Concierge

 →  in one conversation

"Refund resolved + confirmed in ~40 seconds."

Chatbots answer. Action Agents act.

Built on BimpeAI · London Agentic AI Hack Night

The Pain: Apparel Returns Are Broken

Apparel = the highest-return category

~24–30% return rate vs ~17% across all e-commerce

Every return = a support contact

A real person, a ticket queue, a wait.

UK online returns cost retailers ~£27bn/yr

(all UK online returns — Retail Economics / ZigZag, 2024)

| A founder is still answering "where's my refund?" at 11pm.

The Cost Twist

Each refund support call costs **\$3–7**
(industry estimate)

~70%+ of shoppers won't reshop after a bad return experience
(range 67–82% — Coresight / NRF / Shopify 2024)

A slow refund is a **double loss**:
cost now + **churn forever.**

The Insight

Support bots **talk**.

Nobody trusts them to **act**.

The unlock isn't better answers.

It's an agent **trusted to move money**

— and **prove it**.

Chatbots answer. Action Agents act.

✓ The Solution: Refund Concierge

Customer talks → agent **recognizes** customer + order

→ **issues the refund itself** (real Stripe TEST refund)

→ **confirms** via Email + WhatsApp

One conversation. Zero tickets. Zero humans.

Built on BimpeAI. Deployable tomorrow.

Live Demo

 **Recognize** — Ada + order #1024 (\$42.00)

 **Refund** — real Stripe TEST refund (or clearly-labeled simulated re_sim_*)

 **Email** — confirmation fires via Gmail ✓

 **WhatsApp** — second confirmation channel ✓

Dashboard: talk panel · reasoning trail · status board · wow-metric timer

The Number

~40s

Refund resolved + confirmed

vs. human path: ticket queue · \$3–7 call (industry estimate) · hours to days

Business Value

Deflects \$3–7 support calls (industry estimate) — at machine cost

Saves the 70%+ at-risk repeat buyer

A fast refund is **retention**, not a cost

The return tide isn't shrinking

~£27bn all UK online returns/yr; apparel (~24–30%) generates the most contacts

All figures sourced; estimates labeled as estimates

The Platform Play

Same primitives: **conversation + Stripe + confirmation + memory**

 **Refund Concierge** — issues refund, confirms across 2 channels

 **Subscription Saver** — pause / downgrade / cancel a Stripe sub; recovers MRR

 **Pay-to-Book Appointment Agent** — takes a deposit, books the slot

Each one is a published BimpeAI recipe — a recipe swap, not new infrastructure.

Why Us · Why Now

Why now

Voice + agentic tool-use are finally **reliable enough to trust with money**

Customers already live in WhatsApp

Cost of every call rises as margins shrink under returns

Why this stack

BimpeAI wires conversation → Stripe → email + WhatsApp in a dashboard afternoon

Honest: demo is one golden path. The platform is the bet.

The Ask

~40 seconds.

Chatbots answer. Action Agents act.

We're asking for:

-  **The prize**
-  **A pilot with a DTC apparel brand**
